Table of Contents

<i>List of Figures</i>	<i>ix</i>
<i>List of Tables</i>	<i>xvii</i>
<i>Preface</i>	<i>xix</i>
<i>Acknowledgement</i>	<i>xxi</i>

Part 1: Harnessing Science and Technology for Building Resilience to Disasters

1. “Information Technology”: The Utopian Solution to Achieving Disaster Resilience & Ensuring Disaster Management	3
<i>Col. Gaurav Bhatia, Arundhati Bhatia, Ranju Bhatia and Abhimanyu Bhatia</i>	
2. Female Frontline Health Workers’ and ICT in the COVID-19 Response in India	9
<i>Krishnan Sneha and Purwar Deepshikha</i>	
3. Co-creating Climate Resilience Technological Solutions for Poor	18
<i>Siraz Hirani</i>	
4. Exploring the Potential of Solar Energy in Disaster Management and Rescue Operations	28
<i>Pooja Punetha, Sukriti Sharma and Asad H. Sahir</i>	
5. Harnessing Technology for Disaster Risk Management	36
<i>Usman, A. Kibon, Bulus, A. Sawa and Ibrahim M. Bako</i>	
6. Technological Advances in the Development of Disaster Response Management Systems and Applications	47
<i>Amritanjali and Geetanjali Kumari</i>	
7. Reaching Beyond Low Hanging Apples to Technological Convergence to Combat Disasters Like Desertification	53
<i>Kavya Kamepalli</i>	
8. Technological Preparedness for Fire Disasters	61
<i>K. C. Wadhwa</i>	

Part 2: Innovations in Construction Technology

9. A New Fire Safe Design Solution for Reinforced Concrete Beams at Catastrophic Fire Conditions	73
<i>Banti A. Gedam</i>	
10. Seismic Evaluation of Frictional Damper Developed Using Waste Rubber Tires	90
<i>Bharati, Amit Goyal and R. Siva Chidambaram</i>	
11. Flexural Behaviour of Masonry Wall Strengthened with Waste PET Grid	96
<i>Dinesh Chandra Pandey, Amit Goyal and R. Siva Chidambaram</i>	
12. Numerical Approximation of 3D Heat Conduction in Early Age Mass Concrete Using Crank Nicholson Implicit Finite Difference Method	104
<i>Ugwuanyi Donald Chidiebere and Okafor Fidelis Onyebuchi</i>	
13. A Study on the Economic Perspective of Utilizing Liquid Tanks as Dynamic Vibration Absorbers in Building Structures	115
<i>Tanmoy Konar and Aparna (Dey) Ghosh</i>	
14. Smart Shelters for Multi Disasters—A Framework with Cloud Technology and Measurement Devices	123
<i>K. Sasikala, P. Harikrishna, S. Thamarai Selvi and N. Lakshmanan</i>	
15. A Critical Analysis of Building Codes of Pakistan; Fire Safety Provision 2016	138
<i>Ahmed Faraz Khan and Ijaz Ahmad</i>	

Part 3: Using Artificial Intelligence and Internet of Things for Managing Risks of Disasters	
16. IoT Enabled Manufacturing and Health Care Services: Potentialities and Prospects in India	147
<i>Ashok G. Matani and Shamal. K. Doifode</i>	
17. Disasters—A New Setback to be Prepared vis-à-vis Artificial Intelligence	152
<i>Nikhil Kaushal and Prerna Prajapati</i>	
18. Application of Artificial Intelligence for Managing Risks of Disasters	159
<i>Akanksha Jain and Mudit Saxena</i>	
19. Scalable IOT solutions with the Amazon Echo Flex Model for 3P integrations	168
<i>Anil Kumar Bheemaiah</i>	
20. Harnessing Technology for Disaster Risk Management: Internet of Things Applications Towards Mapping of Technologies in Areas of Diagnostics, Testing, Healthcare Delivery Solutions and Equipment Supplies: Challenges and Opportunities in India	173
<i>Ashok G. Matani</i>	
21. Latest Advancements in IoT and Sensors Applications in Renewable Energy Systems Optimization	176
<i>Ashok G. Matani</i>	
Part 4: Application of Remote Sensing, GIS, Drone and UAV for Disaster Risk Management	
22. GIS, Remote Sensing and Drones for Disaster Risk Management	183
<i>Venkata Rajgopala Gunturu</i>	
23. Integrating Weather Model & Remote Sensing Indices for Wheat Yield Prediction in Haryana, India	195
<i>Manjeet, Anurag, Ram Niwas, Rajeev, Dinesh Tomar, Ram Niwas and S. K. Bansal</i>	
24. Floods, Sandbar Dynamics, and its Impact on Communities: GIS Based Case Studies from Assam, India	201
<i>Pulak Das</i>	
25. GIS Based Hazard Mapping and Vulnerability Assessment of Natural Hazards: A Case Study of Rudraprayag, Uttarakhand	212
<i>Vaibhav Pundir</i>	
26. Preparedness and Damage Assessment using UAVs for Management of Flood in India	223
<i>Rudrashis Majumder, Shuvrangshu Jana, Prathyush P. Menon, Debasish Ghose, N. M. Prusty, Bipasha Mukherjee and Aditi Ghosh</i>	
27. Cyclone Preparedness, Rescue Operations and Damage Assessment using UAVs	235
<i>Rudrashis Majumder, Shuvrangshu Jana, Prathyush P. Menon, Debasish Ghose, N. M. Prusty, Bipasha Mukherjee and Aditi Ghosh</i>	
Part 5: Application of Remote Sensing, GIS, Drone and UAV for Disaster Risk Management	
28. Analysis of Compensatory Citizen Services from the Disaster Management Institutional Set Up in India	247
<i>Devashish De</i>	
29. Assessment for Efficient Achievement of Disaster Resilience in India	254
<i>Gargaei M. Chakravarthy</i>	
30. Multi-player Game-based Algorithm Using Set Partitioning for Resource Allocation During Natural Disaster Response	271
<i>Rudrashis Majumder and Debasish Ghose</i>	
31. Comparing priorities of Providers and Users with Respect to Disaster Management Strategies	279
<i>Rajat Agrawal and Div Jyot Singh</i>	
32. Law and Disaster Management: A Critical Understanding	285
<i>Awekta Verma</i>	
33. Governance of Disaster Management: Lessons Learnt and a Roadmap to Avert a Future Chamoli Like Disaster	292
<i>Gopal Vasudeo Wamane</i>	

34. Disaster Risks and Management In India: A Critical Analysis of the Disaster Management Act	300
<i>Akash Kumar Patel and Divya Jain</i>	
35. Democratizing Disaster Risk Reduction: A Local Governance Approach to Contextual Knowledge Production for Flood Planning in Kuttanad, India	311
<i>Kaniska Singh, Fathima Nidha, Rohit Joseph and N. C. Narayanan</i>	
36. Sustainable Operation & Maintenance (O&M) of Multi-purpose Disaster Shelters (MPDS) in Bangladesh	322
<i>Mohammad Shariful Islam, Samira Tasnim Progga and Tahsin Reza Hossain</i>	
37. Disaster Management in India: A Systematic Approach	332
<i>Sunil Kumar Chaudhary</i>	

Part 6: Risk Governance in the Age of Pandemics

38. Existing Resilience Framework for Disaster Risk Management in India	341
<i>Manish Sharma, Nand Kumar and Ashwani Kumar</i>	
39. System Dynamics Approach for COVID-19 Disaster Management	355
<i>Anjali Saraswat and Satish Pipralia</i>	
40. Global Pandemic: Need for a Legal Framework	365
<i>N. Nabila Hoque</i>	
41. Governance for COVID-19 in Bangladesh	374
<i>Nasim Banu</i>	
42. Atmanirbharta—The Journey from Disaster to Human Resilience	385
<i>Falguni Garg and Lakhan Dhameja</i>	
43. Development of Decision Support System for Effective COVID-19 Management	399
<i>Shuvrangshu Jana, Rudrashis Majumder, Aashay Bhise, Nobin Paul, Stuti Garg and Debasish Ghose</i>	
44. Disaster Management Law in the Context of Covid 19	408
<i>Priya A Sondhi</i>	
45. Accelerating Action on SFDRR Targets D, E and G and Related SDGs in this Decade of Implementation	415
<i>Aloysius Rego</i>	

List of Figures

1.1	<i>Types of Disaster</i>	4
1.2	<i>Interdisciplinary Nature of DM</i>	4
1.3	<i>India: Disaster Prone</i>	5
1.4	<i>India: Ranking on the INFORM 2019</i>	5
1.5	<i>India and Neighbours – Comparative Score on the INFORM Index 2019</i>	6
1.6	<i>Satellite Sensing the Globe Through Its On-Board Sensors</i>	6
2.1	<i>Study area map of FFHWs interviewed across India</i>	10
3.1	<i>Project Theory of Change</i>	19
3.2	<i>Realization: Principles of evaluation of Technology by Poor</i>	24
3.3	<i>Barriers to Climate Resilience</i>	25
4.1	<i>(a) Survey results for power failure problem [7][18], (b) possible use of solar energy in disaster management operations [7][18] and (c) power failure during disaster [7][18].</i>	31
4.2	<i>Devices working during a disaster (a) No power failures (b) Complete shutdown including damage to all kinds of grids including damage to solar panels (c) roads blocked, no food supply [7][18]</i>	32
4.3	<i>Types of disasters (including more than one disaster experienced in one or different time) [7][18]</i>	32
4.4	<i>Modern technologies that can help ordinary citizens and disaster personnel in increasing risk-mitigation efforts [7][18]</i>	33
5.1	<i>The Study Area.</i>	37
5.2	<i>Seasonal Rainfall Anomalies for Lake Chad Region (Maidment, Ross, Black, Emily, & Matthew, 2017)</i>	38
5.3	<i>Monthly Rainfall for Lake Chad Region (Maidment, Ross, Black, Emily, & Matthew, 2017)</i>	38
5.4	<i>Total Rainfall in (mm) for Study Area</i>	39
5.5	<i>Land Cover 2000</i>	40
5.6	<i>Land Cover 2020</i>	40
5.7	<i>Land Cover Transition 2000 to 2020</i>	41
5.8	<i>Change in size of Lake Chad water bodies</i>	42
5.9	<i>Rate of Evapotranspiration 2000</i>	42
5.10	<i>Rate of Evapotranspiration 2020</i>	43
5.11	<i>Average Annual NDVI for Study Area</i>	44
5.12	<i>2000 NDVI for Study Area</i>	44
5.13	<i>2020 NDVI for Study Area</i>	45
6.1	<i>Types of disaster data based temporal characteristics</i>	48
7.1	<i>Contributing Factors of Desertification in India (area in Mha)</i>	54
7.2	<i>Rapid Advances in Space Sector by India</i>	56
7.3	<i>Confluence of Space Technologies with Soil Health Card to Combat Desertification</i>	57
7.4	<i>(a) Downscaling and Categorising, (b) Case study in the village Retur, Andhra Pradesh</i>	58
7.5	<i>The Process of Amalgamation of Space Technologies and Soil Health Cards</i>	59
9.1	<i>(a) 24-storey residential Grenfell Tower block in Latimer Road, London, (b) 17-storey oldest high-rise iconic landmark building in Tehran, (c) Fire breaks out at CSIR-National Chemical Laboratory in Pune (India), and (d) Fire Incident at AMRI Hospital in Kolkata (India) [1-3].</i>	74
9.2	<i>A standard time-temperature heating condition for RC beams of the horizontal furnace during testing.</i>	74

9.3	<i>A cross-sectional schematic view and the RC beams installation details at the horizontal furnace for fire resistance testing.</i>	75
9.4	<i>Cross-sectional details of RC beams (all dimensions are in mm): (a) surface exposure conditions and (b) nomenclature of boundary conditions.</i>	75
9.5	<i>Nomenclature for the numerical solution as a two-dimensional unsteady-state heat: (a) internal elements, (b) outer boundary elements and (c) corner boundary elements.</i>	77
9.6	<i>Temperature-dependent stress-strain relationship variation with safety factor: (a) for concrete and (b) for steel.</i>	79
9.7	<i>RC beam strain and stress variation across the section: (a) cross-section details, (b) strain diagram and (c) stress block diagram.</i>	81
9.8	<i>FDM heat transfer model prediction with the test result of the RC beams for NSC at locations T1 (75, 75) and T3 (75, 175).</i>	84
9.9	<i>FDM heat transfer model prediction with the test result of the RC beams for HSC at locations T1 (75, 75), T2 (75, 125), and T3 (75, 175).</i>	85
9.10	<i>Flexural behaviour of RC beams exposed to the external fire load.</i>	86
9.11	<i>Flexural behaviour of RC beams exposed to standard ASTM E119 fire load.</i>	86
9.12	<i>Effects of fire scenarios on the flexural carrying capacity for RC beams using siliceous aggregate.</i>	87
10.1	<i>(a) Vehicle rubber tires (b) strip of a tire (c) rubber pads joined with SR glue (d) hole drilled in rubber pads (e) Damper installed at Beam-column joint</i>	91
10.2	<i>(a) Setup of Damper test, (b) Torque Wrench</i>	92
10.3	<i>Force vs displacement curve of proposed friction damper at (a) 50 N-m (b) 100N-m (c) 200N-m (d) 300 N-m (e) Cumulative energy dissipation curve</i>	93
10.4	<i>Rubber on steel friction test at (a) 50N-m Torque (b) 100N-m Torque (c) 200N-m Torque (d) 300N-m Torque (e) Non-Dimensional force (F_0) versus Cycle number for Rubber tire on steel friction interface</i>	94
10.5	<i>(a) Proposed friction damper installed at beam-column joint (b) Cyclic behavior of beam-column assemblage test without damper (c) with damper (d) Cumulative energy dissipation curve</i>	95
11.1	<i>Manufacturing process of PET grid.</i>	97
11.2	<i>Schematic representation for flexure test for both normal to and parallel to bed joints</i>	98
11.3	<i>Load vs. deflection curve for bending tension (a) normal to bed joint (b) parallel to bed joints.</i>	99
11.4	<i>Failures patterns of masonry wallets in OOP flexure test (a) brittle failure of UN (b) brittle failure of PN(c) brittle failure of UP(d) failure of PET strengthened sample PP</i>	99
11.5	<i>Grid failure ruptures in PET grid</i>	100
11.6	<i>Comparative graph of samples used for flexure test showing(a)Peak deflection at maximum load (b) Energy dissipation</i>	100
11.7	<i>Schematic representation of diagonal tension test set up.</i>	100
11.8	<i>Shear Stress-Strain curve for diagonal tension.</i>	101
11.9	<i>Crack patterns of diagonal test on brick wallets (a) crack initiation in UD (b) failure of UD sample (c) crack initiation in PD (d) interaction of plaster to the PD even after test completion</i>	101
11.10	<i>Comparative graph of samples used for diagonal test showing (a) Peak load at maximum load (b) ductility.</i>	102
12.1	<i>Mass concrete block showing the layout of the thermocouples. (dimensions in mm)</i>	105
12.2	<i>Digital thermometer and Type-K thermocouple.</i>	105
12.3	<i>Cast mass concrete showing the thermocouples.</i>	105
12.4	<i>Graphical user interface (GUI) for the MATLAB programe.</i>	107
12.5	<i>(a) Plot of temperature against time for thermocouple locations (TC1 to TC7), (b) Plot of temperature against time for thermocouple locations (TC4, TC8, TC9 and TC10)</i>	108
12.6	<i>Temperature time relationship for Observed and model temperatures.</i>	109
12.7	<i>Coefficient of determination for model verification.</i>	109

12.8	<i>3D plot of temperature profile at initial time of concrete placement.</i>	109
12.9	<i>3D plot of temperature profile at 24 hours of concrete placement.</i>	110
12.10	<i>3D plot of temperature profile at 48 hours of concrete placement.</i>	110
12.11	<i>3D plot of temperature profile at 72 hours of concrete placement.</i>	110
12.12	<i>3D plot of temperature profile at 96 hours of concrete placement.</i>	110
12.13	<i>Temperature time relationship for Observed and model temperatures</i>	111
12.14	<i>Coefficient of determination for model validation.</i>	111
12.15	<i>3D plot of temperatures in block at 0hr</i>	112
12.16	<i>3D plot of temperatures in block at 24hr</i>	112
12.17	<i>3D plot of temperatures in block at 48hr</i>	112
12.18	<i>3D plot of temperatures in block at 72hr</i>	113
12.19	<i>3D plot of temperatures in block at 96hr</i>	113
12.20	<i>3D plot of temperatures in block at 120hr</i>	113
13.1	<i>Simplified model of building structure with two basic configurations of dynamic vibration absorber (DVA) (a) tuned mass damper (TMD), (b) tuned liquid damper (TLD).</i>	116
13.2	<i>Crystal Tower, Osaka, Japan (a) View of the completed building (https://fr.m.wikipedia.org/wiki/Fichier:Crystal_Tower_Osaka_20060321-001.jpg), (b) one of the tanks of icy water used as auxiliary mass of TMD system (Nagase & Hisatoku, 1992).</i>	117
13.3	<i>One Bloor Street East, Toronto, Canada (a) View of the completed building (https://commons.wikimedia.org/wiki/File:OneBloorEastToronto2018.jpg), (b) TLD used in the building (Lago et al., 2019).</i>	117
13.4	<i>Schematic drawing of example building frame (a) typical floor plan and (b) elevation.</i>	119
14.1	<i>Covid-19 Care Centre</i>	125
14.2	<i>Covid-19 Care Centre</i>	125
14.3	<i>Covid-19 Care Centre</i>	126
14.4	<i>Covid-19 Care Centre</i>	126
14.5	<i>Covid-19 Care Centre</i>	127
14.6	<i>Covid-19 Care Centre</i>	127
14.7	<i>Covid-19 Care Centre</i>	128
14.8	<i>Covid-19 Care Centre</i>	128
14.9	<i>Covid-19 Care Ambulance</i>	129
14.10	<i>Covid-19: Open Ground-converted for Cremation (This is to be addressed, since every Disaster is crossing this phase)</i>	129
14.11(a)	<i>View of cyclone shelter (Model 1)</i>	130
14.11(b)	<i>View of cyclone shelter (Model 2)</i>	130
14.12	<i>View of Earthquake Bamboo Frame Shelter (Ref: Disaster Relief Shelter; Walta Asfaw, David Headley, Nick Liza, Dan Nederhoed, Engr,339/340 Senior Design Project, Calvin College Engineering, 6 May 2013)</i>	131
14.13	<i>View of Tsunami Steel Frame Shelter (Ref: Disaster Relief Shelter; Walta Asfaw, David Headley, Nick Liza, Dan Nederhoed, Engr,339/340 Senior Design Project, Calvin College Engineering, 6 May 2013)</i>	132
14.14	<i>View of Flood-Triangular Timber shelter (Ref: Disaster Relief Shelter; Walta Asfaw, David Headley, Nick Liza, Dan Nederhoed, Engr,339/340 Senior Design Project, Calvin College Engineering, 6 May 2013)</i>	132
14.15	<i>View of 'Smart Building Architecture' (Ref: https://internetofthingsagenda.techtarget.com/definition/smart-home-or-building)</i>	133
14.16	<i>Automation and DOMOTICS (Ref: https://www.thoughtco.com/what-is-a-smart-house-domotics-177572; Photo by Javier Pierini/The Image Bank Collection/Getty Images)</i>	134
14.17	<i>Smart Shelter-Automation and DOMOTICS (Ref: https://internetofthingsagenda.techtarget.com/definition/smart-home-or-building)</i>	134

14.18	<i>Disaster Risk Management Cycle</i> (Ref: https://reliefweb.int/sites/reliefweb.int/files/resources/Dominica%20ESM%20Manual%20%28v9%29.pdf)	135
16.1	<i>Global IoT in healthcare market (2014–2025)</i>	148
18.1	<i>Disaster Management</i>	161
19.1	<i>The Echo Flex from Amazon, an e-literacy solution and a new era in alternative computing models?</i> (im-tomu n.d.; Krol 2019)	168
19.2	<i>I Am Tomu, the New Open Source Arm M3 Based Iot Architecture For Alexa Integration.</i> (im-tomu n.d.)	169
19.3	<i>The Circuit Diagram for the Tomu.</i> (“Tomu - A ARM Microprocessor Which Fits in Your USB Port” n.d.)	169
20.1	<i>Split of doctors and population</i>	174
22.2	<i>GIS in Disaster Management Indian context</i>	187
22.3	<i>General picture of Disaster Recovery</i>	188
22.6	<i>Location map</i>	192
22.7	<i>Google earth image of the study area</i>	192
22.8	<i>Aerial view of the location</i>	192
22.10	<i>Valley on the return path side</i>	193
23.1	<i>Wheat growing sites for NDVI image interpretation in Karnal and Hisar district</i>	197
24.1	<i>Study sites in Chirang and Sonitpur district, Assam, India</i>	203
24.2	<i>Schematic diagram of the geospatial approach.</i>	204
24.3	<i>Planform geometry of uninhabited and inhabited sandbars in study site 1.</i>	205
24.4	<i>Changes in area of uninhabited and inhabited sandbars.</i>	205
24.5	<i>Socioeconomic variables in study site 1.</i>	206
24.6	<i>Planform geometry of sandbars in study site 2</i>	207
24.7	<i>Socioeconomic variables in study site 2</i>	208
25.1	<i>Steps in Hazard Assessment</i>	213
M25.1	<i>Location map of Study Area - Rudraprayag District in Uttarakhand State, India</i>	214
25.2	<i>Methodology for Hazard Vulnerability Mapping</i>	215
M25.2	<i>Administrative Map of Rudraprayag District using ArcGIS</i>	216
M25.3	<i>Elevation Map of Study Area from DEM-SRTM</i>	216
M25.4	<i>Aspect map of Study Area using DEM-SRTM</i>	217
M25.5	<i>Slope Map of Study Area using DEM-SRTM</i>	217
M25.6	<i>Landslide Susceptibility Map of Study Area using Frequency Ratio</i>	218

M25.8	<i>Flood Zonation Map of Study Area classifying flood zones</i>	219
M25.9	<i>Earthquake Zonation Map of Study Area for Earthquake hit on December 6, 2017</i>	219
25.3	<i>Methodology for Social Vulnerability Assessment</i>	220
25.10	<i>Vulnerability Map of Rudraprayag District</i>	220
26.1	<i>Digital elevation map (DEM) in Dihapal, Odisha, India</i>	229
26.2	<i>Indication of structural damages from UAV images</i>	229
26.3	<i>Submerged agricultural land captured from UAVs</i>	230
26.4	<i>Crop damage analysis in Dihapal, Odisha, India</i>	230
26.5	<i>Submerged roads in Dihapal, Odisha, India</i>	231
27.1	<i>Application of UAV in cyclone management</i>	237
27.2	<i>Damages captured by UAVs in West Bengal: damaged building, damaged Jetty, uprooted trees, damaged embankment (anti-clockwise from top corner)</i>	241
27.3	<i>Sagar Island, West Bengal</i>	242

27.4	<i>Analysis of crop damage at Ganga Sagar in West Bengal</i>	242
28.1	<i>Representational image of Earthquake Prone regions in India</i>	250
29.1	<i>World Risk Index-Indicators of India</i>	255
29.2	<i>Total disaster events by type: 1980–1999 vs. 2000–2019</i>	256
29.3	<i>Total numbers of deaths compared to the average number of deaths per disaster by income group (2000–2019)</i>	256
29.4	<i>(a) Global population distribution by income group (millions), (b) Population various types of impacts on countries/territories by income group (2000-2019)</i>	256
29.5	<i>Recorded climate-related disaster losses per income group compared to GDP losses 1998–2017</i>	257
29.6	<i>% of population below poverty lie in Indian states</i>	258
29.7	<i>Action plan</i>	258
29.8	<i>Goal-wise performance</i>	259
29.9	<i>Development of the Public Private Partnership landscape in India through different phases</i>	260
29.10	<i>SPI of India 2016–2019</i>	261
29.11	<i>Contingency Fund of all States</i>	263
29.12	<i>India GDP Growth Rate 2005–2020, Macrotrends</i>	263
29.13	<i>State wise releases of SDRF from 2014–15 to 2017–18 from MHA</i>	264
29.14	<i>Revenue Expenditure on Natural disaster relief of India’s Central and state Governments FY 1991–2018 (in Billion INR)</i>	264
29.15	<i>State wise and EWE wise distribution of morality rates (Deaths/year/million population) during 2000–2019 with state more than 15 million population</i>	265
29.16	<i>SDG Data Index, performance of Indian States</i>	265
29.17	<i>Expenditure on Operations and maintenance of states, 2002–2020</i>	266
29.18	<i>Development Expenditure of the states</i>	266
29.19	<i>Development Expenditure of states with % of GSDP, 2017–2020</i>	267
29.20	<i>Non-Development Expenditure of State, 2017–2020</i>	267
29.21	<i>Development expenditure-Social Sector Expenditure with % of GSDP</i>	268
29.22	<i>Development Expenditure-Capital Outlay with % of GSDP</i>	268
30.1	<i>Flowchart for multi-player game</i>	275
31.1	<i>Steps for comparing priorities of providers and users</i>	282
31.2	<i>Average score for the strategies for both groups</i>	282
34.1	<i>Major Disasters in India Source: Wikimedia Commons</i>	301
34.2	<i>Institutional Framework for DM</i>	303
34.3	<i>Comparison of Impact of Disasters Before and After 2005</i>	307
35.1	<i>Ward Map of Kainakary (Kainakary Gram Panchayat, 2021)</i>	314
35.2	<i>Methodological Choices And Disaster Risk Components.</i>	316
35.3	<i>Class Distribution Within Different Land Typologies, Compiled From The Survey.</i>	318
36.1	<i>Different level of risk zone of Bangladesh</i>	323
36.2	<i>Condition of the existing MPDS in different location (Care Bangladesh and C3ER, n.d.)</i>	325
36.3	<i>Vulnerability (%) of existing MPDS against different disaster (Mahmood, Dhakal and Kamruzzaman, 2013)</i>	325
36.4	<i>Different constructing authorities of MPDS in Bangladesh (Care Bangladesh and C3ER, n.d.)</i>	327
36.5	<i>Different management authorities of MPDS (Care Bangladesh and C3ER, n.d.)</i>	328
36.6	<i>No of occurrence of cyclone on different months from 1960-2010 (https://en.banglapedia.org).</i>	328
36.7	<i>Flowchart showing the steps of survey</i>	329
37.1	<i>Mortality due to natural hazards (1990-2000)</i>	332

37.2	<i>Tsunami of 2004</i>	333
37.3	<i>Bhuj(2001) earthquake</i>	333
37.4	<i>Orissa super cyclone</i>	333
37.5	<i>Bihar Flood 2009</i>	333
38.1	<i>No. of deaths due to various natural disasters in India.</i>	345
38.2	<i>No. of people deaths due to various technological disasters in India.</i>	345
38.3	<i>Comparison of Health infrastructure in various countries of the world.</i>	348
38.4	<i>Mid and high rise development are on the rise in the current developmental scenario.</i>	352
38.5	<i>(a). (b) and (c) Old city cores, characterized by narrow, congested streets, have some old inhabited buildings in dilapidated conditions,</i>	352
39.1	<i>Rinsing Covid cases in India; Rapid antigen covid tests; Increasing mortality rate; Vaccination against coronavirus</i>	356
39.2	<i>Red, orange and green zones classification in Indian districts</i>	357
39.3	<i>Total covid cases in Indian states</i>	358
39.4	<i>Distribution and share of covid cases in Indian states</i>	359
39.5	<i>Causal loop diagram for Covid-19 assessment</i>	361
39.6	<i>Recommendations for Covid-19 management</i>	362
42.1	<i>Diagram depicting natural surveillance</i>	386
42.2	<i>Venn diagram showing the concept of a self-sustained model</i>	388
42.3	<i>Satellite image of the site</i>	389
42.4	<i>Different stages of form evolution</i>	391
42.5	<i>Bird's eye view of the site highlighting various regions</i>	392
42.6	<i>Site plan indicating area coverage</i>	392
42.7	<i>Site plan</i>	393
42.8	<i>Bar chart showing the savings obtained per dwelling unit by using RESCO</i>	394
42.9	<i>Floor plans of cluster type I (Area – 60 sq.m.)</i>	395
42.10	<i>Cluster plan showing the unit connectivity with the courtyard and roads</i>	395
42.11	<i>Section across the cluster</i>	396
42.12	<i>Diagram showing various disaster resilient features</i>	396
42.13	<i>Diagram showing the various construction materials used</i>	397
43.1	<i>COVID management at different level</i>	401
43.2	<i>Input-output block diagram of GUI</i>	402
43.3	<i>Prediction Tab (a)</i>	403
43.4	<i>Prediction Tab (b)</i>	403
43.5	<i>Prediction Tab (c)</i>	404
43.6	<i>Allocation Tab (a)</i>	404
43.7	<i>Allocation Tab (b)</i>	405
43.8	<i>Lockdown Tab</i>	405
45.1	<i>Reducing direct damage to critical infrastructure and basic services disruption</i>	418

List of Tables

2.1	<i>Respondents categories and state for the study on FFHWs in India's COVID-19 response</i>	11
3.1	<i>Treatment Type and Sample Slums, by City Baseline</i>	20
3.2	<i>No. of Sampled HHs by City, Slum type and Treatment Type for Baseline and Endline survey</i>	20
3.3	<i>Vulnerability proportion, by Baseline, Endline</i>	21
3.4	<i>Percentage households with decrease of respective risks and susceptibility by more than 20%</i>	21
5.1	<i>Rainfall for Years 2000, 2005, 2010, 2015 and 2020</i>	39
5.2	<i>Change in LULC from 2000 to 2020</i>	41
5.3	<i>Water Bodies in Sq Km</i>	41
5.4	<i>Average Annual NDVI value of the Lake Chad from year 2001 to 2019 (19yrs)</i>	43
7.1	<i>Status of Desertification in India</i>	55
9.1	<i>Summary of the stress-strain relationships for NSC and HSC at elevated temperatures</i>	80
9.2	<i>Optimized thermal material properties for heat transfer analysis</i>	83
9.3	<i>The fire-resistance rating for RC beams at different fire scenario</i>	88
11.1	<i>Material properties of constituent materials</i>	97
11.2	<i>Specimen dimensions and strengthening details</i>	97
13.1	<i>Damper cost as percentage of total building construction cost (P_d) for DVAs in the form of water tanks.</i>	118
13.2	<i>Damper cost as percentage of total building construction cost (P_d) for other conventional dampers.</i>	119
13.3	<i>Salient parameters of example building structure.</i>	120
21.1	<i>Renewable energy capacity (GW) – for the year 2018</i>	177
22.1	<i>Methods and List of Data Aquisitions</i>	186
23.1	<i>Weather and spectral indices used in models using composite weather variables</i>	197
23.2	<i>Effective weather parameters for Hisar and Karnal district (Sum products-correlation)</i>	198
23.3	<i>Agromet regression model equation for Hisar and Karnal districts</i>	198
23.4	<i>Validation of Agromet models</i>	199
23.5	<i>Regression yield model equation developed with addition of NDVI (MODIS) for Hisar and Karnal district</i>	199
23.6	<i>Validation of Agromet-spectral (MODIS-NDVI) Yield models for wheat yield estimation for districts Hisar and Karnal during 2015-16& 2016-17</i>	199
25.1	<i>Details of Data Source</i>	215
25.2	<i>Secondary Data for Social Vulnerability Assessment</i>	219
25.3	<i>Social Vulnerability of Study Area</i>	221
28.1	<i>Reference to select projects and missions that are integrated in Disaster Management</i>	248
28.2	<i>India Disaster Vulnerability in %ages⁸-Rough Estimates.</i>	250
28.3	<i>Compensation/ Insurance package⁹</i>	251
30.1	<i>Resource allocation using set partitioning</i>	275
31.1	<i>Identified disaster management strategies</i>	281
31.2	<i>Average ranking for disaster management strategies</i>	282
34.1	<i>NDMA and Important Sections</i>	302
34.2	<i>Comparative Analysis of DM Act of India, South Africa, Philippines, and Australia</i>	305
34.3	<i>Strengths and Weaknesses of DM Act</i>	308

35.1	<i>Mean Flood Level In Different Land Typologies, Compiled From The Survey And Spatial Mapping.</i>	317
36.1	<i>Basic details of the 3 standard designs of cyclone shelters (Cyclone Shelter Policy, 2011)</i>	324
36.2	<i>Responsible authority for MPDS management in different situation (Cyclone Shelter Policy, 2011)</i>	327
38.1	<i>Disaster Management Action Priorities in developed and developing regions</i>	342
38.2	<i>Countries with highest numbers of deaths due to natural disasters during the period 1997-2017 and their respective populations for 2017.</i>	342
38.3	<i>Some of the major the disaster events in India during the period 1999-2014.</i>	343
38.4	<i>Damage due to natural disasters in India.</i>	344
38.5	<i>Supporting ministries for different disasters in India.</i>	346
38.6	<i>Status of Health Centres in India in 2005 and 2012.</i>	349
38.7	<i>Healthcare staff status in India.</i>	350
41.1	<i>The Shortage of Bangladesh Health Care Personnel in March 2020</i>	376
42.1	<i>Risk Assessment Matrix (From TARU Leading Edge, 2020)</i>	386
42.2	<i>Risk assessment matrix for Bhoi nagar, Bayababa slum site in Bhubaneswar, Odisha</i>	390
42.3	<i>Area Statement</i>	393
45.1	<i>Selected achievements and challenges of international DRR Governance under HFA.</i>	417
45.2	<i>Ministerial Distribution of Official Sendai Focal Points in OECD Countries.</i>	419
45.4	<i>Progress on National DRR Strategies by region</i>	420
45.5	<i>Progress on 'Local' DRR Strategies by region</i>	421
45.6	<i>Similarities and differences between Chile and Ecuador</i>	421
45.7	<i>Disasters and losses, by African Regional Economic Community (REC), 2015–2018 (Van Niekerk, 2019)</i>	422
45.8	<i>African member states' progress: Sendai Framework Target (E)</i>	422
45.9	<i>Similarities n differences between global input indicator G from Chile and Ecuador</i>	425
45.10	<i>Sections and Information in the Gap Reports</i>	427
45.11	<i>Data disaggregation and statistical processing - SDG 11.5.2 and SFDRR Target(d)</i>	428
45.12	<i>Number of countries at a specific stage of reporting SFDRR indicators for year 2018 as of Oct 2020. (UNDRR,)</i>	428

Preface

The Fifth World Congress on Disaster Management (WCDM) was organised in Delhi from 24th to 27th November 2021 jointly by the Government of Delhi, the Indian Institute of Technology Delhi, and the Disaster Management Initiative and Convergence Society which created the platform of WCDM. Over the years, WCDM has emerged as the largest conference on disaster management in the developing world.

The theme of the Fifth WCDM was *Technology, Finance and Capacity*. 7 Plenary Sessions, 50 Technical Sessions and Special Technical Sessions were organised around this overarching theme. While eminent thought leaders and experts delivered keynote addresses and participated in the panel discussions of the Plenary Sessions. It is the Technical Sessions that received the longest traction as Call for Papers was issued for these sessions months in advance and more than 600 researchers, practitioners and policy makers responded with abstracts of their ideas. These were reviewed by experts and subsequently, 250 of these abstracts were developed as full papers. This is the first of five-volume series of compendium of these papers.

The papers have been published in the same form these were received without any peer review to provide a flavour of the raw ideas that emerged from the Technical Sessions of the conference. Some of these papers presented by the young researchers and practitioners may not have the rigours of academic disciplines, but these do reflect the cross current of thoughts that went around in these sessions of the Conference. These provide new ideas and insights that provide value to the current discourses on the subject.

These papers have been arranged under five broad themes—first: Disaster Risk Management, second: Nature and Human Induced Disasters, third: Coronavirus Pandemic, fourth: Disaster Response and fifth: Challenges and Opportunities of Disaster Management. Understandably the papers do not cover every aspect of the themes, these discuss only those aspects that the authors have chosen to highlight. The present volume is a compilation of 45 papers on the theme of Disaster Risk Management, which is further divided into six sub-themes, first: Harnessing Science and Technology for Building Resilience to Disasters, second: Innovations in Construction Technology, third: Using Artificial Intelligence and Internet of Things for Managing Risks of Disasters, fourth: Application of Remote Sensing, GIS, Drone and UAV for Disaster Risk Management, fifth: Disaster Management Laws and Governance and, sixth: Risk Governance in the Age of Pandemics.

The Conference secretariat has brought the papers together, but his credit lies solely and exclusively on the authors.

Dr S. Ananda Babu
Convener
Fifth World Conference on Disaster Management

Acknowledgement

DMICS, the organizer of the 5th World Congress on Disaster Management (WCDM), expresses its deep appreciation to Government of Delhi (GNCTD), NDMA, NIDM, DRDO, UNICEF, ICMR, GSI, and Knowledge Partners, delegates who have supported the 2021 World Congress on Disaster Management with either earmarked or unearmarked contributions. A special acknowledgement goes to Indian Institute of Technology, Delhi for hosting the 5th WCDM for its strong support.

DMICS would like to express our deepest appreciation to Hon'ble Union Minister of Defence, Shri Rajnath Singh for inaugurating the 5th WCDM and delivering the inaugural address; Mami Mizutori, UN-DRR Chief and Special Representative of the UN Secretary General for her special message and Dr Balram Bhargava, Secretary, DHR and Director General, ICMR for his key note address. We would also like to convey our heartfelt appreciation and gratitude to Prof. V. Ramgopal Rao, Director of IIT Delhi, Dr. Parvez Hyatt, for their strategic support and guidance. Our indefatigable team members, Col. Sanjay Srivastava, Dr. Chandrappa, Dr. A. Kishan, Prof. B. Gopal Rao, Mr. Bhaskar Rao Volam, Dr. B. Ram, Prof. V. Prakasam, Dr. A. Gayathri Devi, Dr. R.K. Srivastava, Mr. Amit Kumar, Mr. Mohan Kasthala, Mr. Pavan Parlapalli, Mr. Manish Vishnoi, Ms. Suparna Dutta, Ms. Parul Sharma, Ms. Megha B Bhati, M. Zoya Khan, Ms. Areeba Naaz, Mr. Rohit Kumar Azad and Ms. Shweta Zanjrukia, deserve a huge appreciation for working tirelessly for the last one year in ensuring that 5th WCDM reaches new horizons in bringing together the Government Duty bearers, Policy makers, Planners, Researchers, Academicians, Practitioners and other key stakeholders.

DMICS extends its sincere gratitude to the large number of organisations, individuals and volunteers who have contributed to the 5th WCDM, through technical support and in numerous other ways. DMICS would like to express its deepest appreciation also to the members of the Scientific and Technical Committee (S&TC) along with its Chair, technical leads and collaborative organisations of Pre-Conference Webinars, Plenaries, Special Feature Events, Special Technical Sessions and Exhibitors.
